WORK EXPERIENCE

Frontend Developer — PS Software Solutions, Bengaluru

Nov 2025 – Present

- Built the complete React.js / Next.js frontend for idrooms.in — a live hotel, PG & hostel booking platform — from scratch to production.
- Developed reusable component libraries, dynamic dashboards, and role-specific UI for Customer, Agent, Admin, and Super Admin roles.
- Integrated 20+ REST APIs using Axios and TanStack Query with proper loading states, error handling, and optimistic updates.
- Managed global state with Redux and delivered a fully mobile-first, cross-browser-compatible interface across all major devices and browsers.
- Optimised frontend performance through lazy loading, code-splitting, and responsive image handling for production traffic.

Junior Frontend Developer — Elite Tech Corp, Bengaluru

Mar 2024 – Jun 2025

- Delivered multiple React.js production applications including a Real-Time Chat app, E-Commerce Platform, and Project Management System.
- Built and maintained reusable React component libraries, reducing duplicate UI code and cutting development time across projects.
- Integrated REST APIs via Axios with robust error handling and async/await patterns; deployed apps on Zoho Catalyst with automated CI/CD.
- Converted Figma designs into pixel-perfect, responsive interfaces with strong attention to spacing, typography, and interaction quality.

KEY PROJECTS

idrooms.in — Hotel, PG & Hostel Booking Platform [↗ idrooms.in](https://idrooms.in)

Stack: *React.js, Next.js, TanStack Query, Redux, Tailwind CSS, REST APIs, SEO Optimizations*

- Built the complete frontend for a live booking platform — multi-role dashboards, booking workflows, and real-time search/filter UI.
- Integrated 20+ REST APIs with optimised data-fetching patterns; delivered a mobile-first UI with consistent cross-browser experience.

SmartLeave — Employee Leave & Attendance Management

Stack: *React.js, Redux, Tailwind CSS, REST APIs, JWT Auth*

- Developed the full React.js + Redux frontend with a leave calendar, real-time status tracking, and multi-role UI for Employee, Manager, and HR Admin.
- Implemented responsive dashboards with clean component architecture and automated email notification triggers on status changes.

ResuMatch AI — AI-Powered Resume Analyser

Stack: *React.js, LLM APIs, REST APIs, Vercel*

- Built a clean, single-page React.js UI that analyses resumes against job descriptions — returning ATS scores, keyword gaps, and suggestions.
- Integrated LLM APIs for intelligent feedback; deployed on Vercel with CI/CD from GitHub, optimised for fast load performance.
